# Steel, the fabric of life

We produce over **2 million tons of steel** every year from iron ore and recycled scrap. ArcelorMittal Long Products Canada steel is used in such major projects as the Hibernia and Hebron oil drilling platforms and the new Highway 30 south of Montreal, for example.

ArcelorMittal Long Products Canada is also...

- ...the largest **canadian** manufacturer of rebar for the construction industry.

- ...the **world's** largest manufacturer of steel for leaf springs used in the major auto maker's light trucks and heavy-duty trucks.

- ...the preferred supplier for the **world's** largest welding products manufacturer.

These are only a few examples of the many uses of ArcelorMittal Long Products Canada steel, **the fabric of life.**

# Driving local and regional economies

With solid roots in our host communities for decades, we play an active role in the development of regions in which we operate.

ArcelorMittal Long Products Canada has over **1,700 employees** who live near the facilities where they work. The company generates annual economic spinoffs of more than **\$1 billion** in wages and benefits, taxes, investments and purchases of goods and services, thereby contributing to growth on Montreal's South Shore, in Quebec and in Ontario. We are also proud to play a role in the success of the **1,600 suppliers** who directly or indirectly support our operations, which also creates additional jobs.

ArcelorMittal Long Products Canada is the most important Canadian company in iron ore **mining and processing**, boosting the local economy. Iron ore from the group's sister company in northern Quebec, ArcelorMittal Mining Canada, is processed up to **six times** before it is finally used.

# Social responsibility: more than words

ArcelorMittal Long Products Canada endeavours to give back to its host communities and minimize the impact of its operations on the environment where the company operates.

Every year we support various organizations in the fields of **education, environment, sports and recreation, health and social services** and **arts and culture**.

We are one of the main contributors to the Richelieu-Yamaska region's Centraide/United Way campaign, and award scholarships annually to students at many schools in Greater Montreal and Montérégie.

- We are the **largest recycler in Quebec** processing near one million tons of scrap at our facilities every year. Steel from 150 years ago is still part of our lives today.
- Close to 100% of the materials that enter our scrap recycling and processing centres are recycled or reclaimed.
- Four of our plants have achieved the GOLD level in the Recyc-Québec ICI On Recycle! program with a waste recovery rate of over 90%.

# Our history

**1914**

The St. Patrick Street wire mill begins operations in Montreal.

**1958**

Stelco Steel builds a tube plant in Contrecoeur, then opens a rolling mill in 1965 and steelworks in 1974.

**1968**

The Quebec government acquires Dosco (Dominion Steel Corporation). Dosco merges with Sidérurgie du Québec (Sidbec) to form Sidbec-Dosco, creating an integrated steel company in Quebec.

**1994**

The government privatizes Sidbec-Dosco, selling the company to Ispat International; it then becomes Ispat Sidbec.

**1999**

Ispat International purchases Inland Steel, USA, through Ispat Sidbec.

**2004**

Ispat Sidbec's name changes to Mittal Canada.

**2006**

Mittal Canada acquires the Stelco complex in Contrecoeur, as well as two wire mills in Montreal and Hamilton.  
Mittal Steel merges with Arcelor in July.

**2008**

Mittal Canada's name changes to ArcelorMittal Montreal.

**2016**

ArcelorMittal Montreal becomes ArcelorMittal Long Products Canada to better reflect its geographical diversity and its product line.

# Working at ArcelorMittal Long Products Canada

There are many stimulating job opportunities in the metals sector and ArcelorMittal Long Products Canada is no exception. The fact that our workers belong to an international company gives them access to extensive knowledge and training opportunities. Renowned for the quality of our steel, we nurture and encourage **continuous improvement**. Our employees are at the forefront when it comes to problem-solving, with workers of all levels actively contributing. First and foremost, **health and safety** is more than a priority – it's a company value. It means a strong emphasis on prevention and shared vigilance, but also a focus on activities aimed at improving the health and well-being of our employees.

**Competitive compensation**, not to mention **proximity to their workplace, for residents of Montreal's South Shore**, are other factors that make ArcelorMittal Long Products Canada an employer of choice.

We regularly have job openings in skilled trades and unskilled fields, as well as jobs for technicians, managers and professionals. Recent graduates and experienced workers are welcome!
